

## High Foam Detergent II

TW1010

*Tidal Wave's High Foam Detergent II* is our foaming detergent developed with an emphasis on foam-generation and high detergency. It is a concentrated formula loaded with foaming surfactants and ingredients to penetrate and remove the toughest dirt and grime while generating copious amounts of rich, shaving-cream quality foam. In addition, it will lubricate brushes and cloth, and will rinse completely from the vehicle.

**High Foam Detergent II** can be used as a high-pressure soap or at low-pressure through foaming nozzles or a foam generator with compressed air in any full-service, exterior, tunnel, automatic, hybrid, or self-service car wash. It also makes an excellent foam brush detergent where white foam is desirable. This product is compatible with all foam sticks, K sticks, foam heads and foam nozzles, as well as all volcano arches, waterfall arches, bubblicizers and foamers, in all types of washes.

**Product Form:** Liquid

**Product Appearance:** Blue

**pH:** 8

**Foam:** Very High
