

Low pH Shampoo **ULTRA Concentrate**

TW3003

Tidal Wave's **Low pH Shampoo** is a highly-concentrated, acid-based foaming detergent with a pleasant cherry or citrus fragrance. With an emphasis on foam-generation, it produces large amounts of thick, rich foam at an economical price.

Our **Low pH Shampoo** can be used in any full-service, exterior, tunnel, automatic, hybrid or self-service foaming application, but it really shines when applied through a foam generator with compressed air. This product will work with all foam sticks, K sticks, foam heads, foam nozzles, as well as, all volcano and waterfall arches, bubblizers and foamers in all washes.

In tunnel and automatic washes, **Low pH Shampoo** offers an extremely low cost per car. In waterfall arches, generous foam can be produced at high dilutions. In foamers and K nozzels, rich and thick shaving cream foam is easily produced. Excellent cleaning and detergency. Excellent brush lubricant. Hard water tolerant.

In self-service washes, **Low pH Shampoo** can be used for high-pressure soap and white foam brush. Very high foaming, excellent cleaning and hard water tolerant. Excellent foam brush lubricant. Recommended for foam brush systems using air operated pumps only.

Product Form: Liquid

Product Appearance: Amber

pH: 2

Foam: Very High
