

Product Technical Data Sheet

Wave-Off

TW7003

Wave-Off is our best, highly advanced and concentrated online vehicle enhancement, providing shine, protection and rain and water repellency. It leaves a long-lasting, thin molecular coating on the vehicle's glass and entire body surface. This provides improved visibility during wet conditions by repelling rain and water, causing it to bead into droplets that roll out of view. This product is a bold yellow color with a pleasant strawberry fragrance. You can see the visible sparkle on the body and glass, as well as feel the smooth finish with your hand or a towel.

Wave-Off is usually applied through a foaming k nozzle arch or k sticks at low-pressure toward the end of the tunnel before final rinsing of the vehicle. Follow this application with standard drying agents or protectants. This product produces extremely dry cars.

Product Form: Liquid

Product Appearance: Green

pH: 7

Foam: High

Foam Color: Yellow

Automatic Tunnel Wax / Protectant Arch Working Dilution: 80 – 100:1

Recommended Hydrominder Tip: Dark Brown

Recommended Hydriflex Tip: Red Injector – Tan Tip

Orange Injector – Pink Tip

Grey injector – Light Blue Tip

Blue Injector – Pink Tip

Green Injector – Brown Tip

Self-Serve Working Dilution: 1100 – 2000 :1

Recommended Hydrominder Tip: Purple
