

Product Technical Data Sheet

Machine Shine – Silicone Oil-Based Dressing

ULTRA
Concentrate

TW4011

*Tidal Wave's **Machine Shine*** is a wet-look dressing with a high-concentration of silicones to offer immediate and long-lasting shine. It provides an instant and consistent high-gloss shine – wheel, after wheel. This product displaces and repels water on wet tires, while blocking U.V. and ozone.

No Sling Formula! When passing through dryers and blowers and when your customer drives off, our formula will not sling off. Its stable viscosity allows consistent performance in all weather, hot and cold environments, and when piped through long or short distances from equipment to applicator. Machine Shine stays on the tires and applicators, and it does not pool!

Odor Free Formula!

Machine Shine can be used in any tire shine machine *or* may be applied manually with a brush, cloth or spray bottle. *Tidal Wave's **Machine Shine*** is an excellent hand-applied dressing.

Non-flammable formula

Product Form: Liquid

Product Appearance: Clear

Packaging: 5, 30, 55 Gallons
